CDIO Initiative
Proceedings of the International CDIO Conference ISSN 2002-1593

Editorial

The CDIO Initiative is an approach to designing innovative educational frameworks, aiming for educations that support students in developing the necessary professional skills required of a practicing engineer while simultaneously acquiring strong technical fundamentals. This is done by providing students with dual-impact learning experiences that are based upon the lifecycle of an engineering project, the Conceiving-Designing-Implementing-Operating (CDIO) of real-world products, processes, and systems. Throughout the world, close to 200 institutions have adopted CDIO as the framework for curriculum development.

CDIO collaborators recognize that engineering education is acquired through programs of varying lengths and stages in a variety of institutions and that educators in all parts of this spectrum can learn from practice elsewhere. Several times each year, CDIO collaborating institutions, engineering educators and researchers gather to exchange ideas and experiences, review developments, assess and further refine the CDIO approach.

The Annual International Conference is the key event for the CDIO community where CDIO practitioners from all over the world come together, share knowledge and promote the advancement of the practice of the CDIO initiative for producing the next generation of engineers. It includes presentations of papers as well as specialized seminars, workshops, roundtables, events, and activities.

The 19th CDIO International Conference took place in Trondheim, Norway, June 26-29, 2023, hosted by the Center for Science & Engineering Education Development (SEED) at the Norwegian University for Science & Technology (NTNU).

The main theme of the conference was “**Engineering education for a smart, safe and sustainable future**”. The theme is present in the keynote presentations, paper presentations, roundtables, workshops, and the panel debate on the final day of the conference. The program covered many aspects of engineering education, such as sustainability, lifelong learning and change leadership. Specific topics covered were curriculum agility, emotion and reason in engineering education, digital transformations and of course aspects on operationalization of the CDIO Standards and the CDIO Syllabus.

The conference includes three types of contributions: Full Papers, Project in Progress contributions, and Extended Abstracts for Activities. The Full Papers fall into three tracks: Advances in CDIO, CDIO Implementation, and Engineering Education Research. All contributions have undergone a full single-blind peer-review process to meet scholarly standards. The Projects in Progress contributions describe current activities and initial developments that have not yet reached completion at the time of writing. The Extended Abstracts summarize the Roundtable Discussions and Workshops held at the event.

Initially, 216 abstracts were submitted to the conference. The authors of the accepted Full Paper and Projects in Progress abstracts submitted 128 manuscripts to the peer review process. During the review, 375 review reports were filed by 101 members of the 2023 International Program Committee. Acceptance decisions were made based on these reviews. The reviewers’ constructive remarks served as valuable support to the authors of the accepted full papers when they prepared the final versions of their contributions. We want to address our warmest thanks to those who participated in the rigorous review process.

A total of 78 educational institutions from 33 countries, representing 6 continents, were present during the conference. The total number of registered participants at the conference was 288.

This publication, which is available as an electronic publication only, contains the 85 accepted Full Papers that were presented at the conference, of which 3 are Advances in CDIO; 55 CDIO Implementation; and 27 Engineering Education Research. These papers have been written by 260 different authors representing 30 countries. Additionally, 21 CDIO Project in Progress contributions were presented at the conference but are not included in this publication. Also, a total of 33 collaborative contributions for activities in 17 Workshops, 12 Roundtable Discussions and 4 Working Groups took place, as well as a range of social events.

Note that the Conference Proceedings is SCOPUS Indexed.

We hope that you find these contributions valuable in developing your own research, curriculum development, and teaching practice, ultimately furthering the engineering profession. We also hope that you benefit through the truly unique community of practice that exists within the CDIO Initiative.

We wish all of you a wonderful CDIO experience!

Contents

I Advances in CDIO	1
3: Education As Complex System: Need for More Forward-Looking CDIO Program Evaluation by Sin-Moh Cheah.....	3
32: Curriculum Agility As Optional CDIO Standard by Suzanne Brink, Carl Johan Carlsson, Mikael Enelund, Kristina Edström, Elizabeth Keller, Reidar Lyng, and Charles McCartan.....	18
155: Evaluating and Enhancing the Status of Sustainability in Engineering Education by Anders Rosén, Eva Liedholm Johnson, and Joakim Jaldén.....	29
II CDIO Implementation	43
4: Developing a Didactic Foundation for the Tech Faculty at Aarhus University by Geir Egil Dahle Øien and Jens Bennedsen	45
5: Reflections About Reflections by Svante Gunnarsson, Urban Forsberg, and Daniel Axehill	56
8: A Framework for a Sustainability Transition of Two Engineering Master’s Courses by Anders Adlemo	67
9: Is My Master Thesis Research Project Sustainable? Including Sustainability In "Research Methodologies" by Ines Uriol Balbin.....	84
10: Chemical Engineering Education: Pedagogy for Learning from Failure in Process Plant Operations by Sin-Moh Cheah	94
17: Inquiry, the Scientific Tool for All Instructional Methodologies by N. M. Masoodhu Banu, Padmanabha Sarma. A, Thiyam Deepa Beeta.....	110
20: Training Future Skills - Sustainability, Interculturality & Innovation in a Digital Design Thinking Format by Linda Steuer-Dankert	119
21: Scaling Up Project-Based Learning in Engineering Beyond 100 BSc Students: A Practical Approach by Claas Willem Visser and Cornelis H. Venner	131
23: Pneumatics Laboratory Interactive Educational Experience Development by Ivanna Sandyk, Margus Müür, Vladimir Kuts, Yevhen Bondarenko, Simone Luca Pizzagalli, and Tiia Rütman... ..	144
27: Embedding the Social Sciences in Engineering Education: Collaboration with a Politics Degree by Susan Kenyon	155
37: Blended Laboratories for Joining Technology Shahram Sheikhi, Konstantin Bronstein, Eduard Mayer, Robert Langer, Azadeh Reise, and Christian Stöhr.....	166
40: CDIO and Competency-Based Learning Approaches Applied Together to Military Engineering Education by André L. T. Rezende, Carlos F. M. Chagas, Gustavo S. Rodrigues, and Suzana M. C. Magalhães	179
41: Embedding Sustainability and Ethical Competences Into Engineering Education Following CDIO by Juhani Angelva, Maisa Mielikäinen, and Tauno Tepsa	190
42: Development of Simulation Tools to Enhance the Real- World Connections for Active Learner by Hiromasa Ohnishi	201
43: The KTH Guide to Scientific Writing: Sparking a Conversation About Writing by Jane Bottomley, Jamie Rinder, and Susanna Zeitler Lyne.....	208
47: The Student Flight Data Recorder – Building a Culture of Learning from Failure by Calvin Rans, Julie Teuwen, and Helena Momoko Powis	218
52: Project Seminar – Reconstructing the Capstone Project Process by Liviu Gal, Gabriela Dorfman Furman, and Zeev Weissman.....	228
54: Experiences on the Creation of a Multi-Disciplinary Course in a Metaverse Environment by Elina Kontio, Werner Ravyse, Teppo Saarenpää, Timo Haavisto, Mika Luimula, Emiliana Pizarro-Lucas, P. Ignacio Dorado-Diaz, and Pedro L Sanchez.....	239

55: A Design-Implement Experience within Computer Vision by Aldo André Díaz-Salazar and Svante Gunnarsson.....	251
56: Online Courses for Teaching Engineering Professionalism by Aseel Berglund	258
58: Development of Meaningful Lesson Using LXD Methodology for an Engineering Module by Zhao Meijun, Edwin Foo, Flex Tio, and Kwek Siew Wee	273
59: Mechanised Bridges: Development of a Novel, Multidisciplinary, Design and Build Project by Scott Wordley, Michael Crocco, Veronica Halupka, and Tony Vo.....	283
61: Fusing Programming and Thermodynamics in a First Year Engineering Course by Maria Gudjonsdottir	294
64: Building Up the Relevance in Economics Education and Assessing Its Effect by Yu-Chen Kuo	302
65: VUCA and Resilience in Engineering Education – Lessons Learned by Siegfried Rouvrais, Ann-Kristin Winkens, Carmen Leicht-Scholten, Haraldur Audunsson, and Cecile Gerwel Proches	312
67: Case Study on Integrated Curriculum Using Spiral Curriculum Model for Chemical Engineering by Katerina Yang, Ai Ye Oh, Siew Teng Phua, and Yunyi Wong	323
68: A CDIO Approach to Teach Sustainability in Architecture by Yenn Giin Ho, and Yiat Yam Leong	336
78: Induction Diamond Labs - Giving Everyone an Equal Starting Point by Joanna Bates, Andrew Garrard, and Edward Browncross	349
82: Conceiving, Designing and Implementing the Mechanics Teachers Social Club by Marta Gavioli and Grant Penny	358
84: Evaluating the Use of ITP Metrics In Supporting Teamwork by Tony Topping, Matt Murphy, and Samuel Saunders	368
85: Enhanced Assessment and Learning Through Adaptive Comparative Judgement by Tony Topping, Matt Murphy, and Samuel Saunders.....	379
86: An Introductory Reverse Engineering Project to Enhance Teaching Staff and Student Competence by Ahmed Tamkin Butt, Xzara Foster.....	390
94: Engineering Minor in Architecture, A Model for Interdisciplinary Specialization and Contextual Learning by Reidar Lyng, Anders Rönquist, Bendik Manum, and Simen Dalen Taraldsen.....	403
97: Adapting Entrepreneurship Techniques for Creative Technical Course Design by Emily Marasco and Laleh Behja.....	414
98: Integration of Graduate Employability Skills Through Industry Outsourced CDIO Project by Soumya K Manna, Nicola Joyce, and Anne Nortcliffe	425
100: Facilitating Staff Implementation of Teamwork Measurement for Engineering-Related Project-Based Modules by Lim Joo Ghee, Tan Kwee Teck, Safura Anwar, and Toh Ser Khoon	436
101: Case Studies of Integrating Project Based Learning Into Polytechnic Engineering Curriculum by Eunice Goh Shing Mei, Kwek Siew Wee, Ang Wei Sin, Kent Loo, Hengky Chang, Cheah Chi Mun, Li Ying, and Eunice Chia	447
102: Designing an Introductory First-Year Course for an Electronics Engineering Program by Mario Medina.....	461
112: Python in a Week — Conceptual Tests for Learning and Course Development by Christopher Blöcker, Thomas Mejtoft, and Nina Norgren.....	470
117: Promoting Curriculum Agility Through Project-Based Learning: Case of the Australian University (Kuwait) by Hassan Salti, Hania El-Kanj, Fadi Alkhatib, and Mohammed Abdul-Niby..	481
120: Sustainable Aircraft Design in Engineering Education: Conceive, Design, Implement, and Operate Virtually by Alexander Somerville, Luke Pollock, Keith Joiner, Timothy Lynar, and Graham Wild.....	491
127: Bringing Reflective Writing to the Engineering Classroom by Marcel Kyas, Joseph Timothy Foley, and Markéta Foley	502

130: Creating and Deploying an Electronic Engineering Master Program Based on CDIO Framework by Binh D HA, Truong V Truong	512
137: Practice-Based Engineering Design for Next-Generation of Engineers: A CDIO-Based Approach by Salman Saeidlou, Nikdokht Ghadiminia, Anne Nortcliffe, and Stuart Lambert.....	525
138: Framework for the Evaluation of Cybersecurity Curriculum Educational Content by Antti Hakkala, Anne-Maarit Majanoja, Ville Leppänen, and Seppo Virtanen	543
163: A Challenge Based Learning Community for Hydrogen Development and Application by J.A.P. Gelten, B.J. Aalderink, R.P. van Leeuwen, M.M.A. Disberg-van Geloven, S. Corporaal, and Y. Hajimolana.....	555
168: Case-Based Learning in Collaboration Across Universities to Enhance Students' Understanding of Sustainability by Victor Eriksson, Anne-Maria Holma, and Frida Lind	567
179: Teaching Competency Development Framework for SRMIST Faculty Members by Rajeev Sukumaran and Vairavel Gurusamy	581
185: Drone Game That Highlights Ethical and Sustainability Implications of Design Decisions by Siara Isaac, Gianni Lodetti, Jessica Dehler Zufferey, and Barbara Bruno	591
187: Student Perspectives on Online Hybrid Learning in an Undergraduate Robotics Course by Erik Kyrkjebø and Martin F. Stoelen	602
190: Sustainable Systems Engineering Program: Meeting All Needs within Means of the Planet by Robyn Mae Paul, Marjan Eggermont, and Emily Marasco.....	614
191: Experiences from Implementing a Scholarship of Teaching and Learning Program for Teachers by Hanne Løje.....	624
200: Enabling Lifelong Learning by Using Multiple Engagement Tools by Donatella Puglisi and Guillem Domènech-Gil	633
202: Maximising Academic and Social Outcomes by Neil Cooke, Jörgen Forss, Sarah Chung, and Jesper Andersson.....	644
211: Integrating Sustainability Thinking in Information Systems – Experiences from an Enterprise Architecture Course by Sobah Abbas Petersen	656
III Engineering Education Research.....	667
11: Networking Change Leader – New Role for a Program Director in Engineering Education by Magnus Andersson.....	669
12: From University to Work: Alumni Viewpoints by Helena Kovacs, Iris Capdevila, Patrick Jermann, and Isabelle Lermigeaux-Sarrade	679
13: The Nature of Progression Between Yearly Project Courses by Camilla Björn, Kristina Edström, Liv Gingnell, Joakim Lilliesköld, and Marie Magnell	692
19: Skills Assessment in Innovation and Entrepreneurship Education Initiatives by Alessandra Scroccaro, Jeanette Engzell, Charlotte Norrman, Milena Bigatto, and Cia Lundvall.....	705
29: Teaching Engineering As a Design Science by Remon Rooij and Linette Bossen.....	720
39: Group Practices in a Collaborative Design Project – A Video-Ethnographic Study by Jonte Bernhard, Jacob Davidsen, and Thomas Ryberg.....	732
48: The Green Energy Transition - A Case for Lifelong Learning by Jerker Björkqvist, Magnus Hellström, Andrei-Raoul Morariu, and Janne Roslöf	746
74: Student Reflective Practice As Part of Engineering Programmes by Gareth Thomson and Klara Kovesi.....	759
75: Who Am I Learning to Become? Integrating Personal Development in Curriculum Design by N.L. Bohm, M.J. Hoekstra, L.P.J. van den Burg, and M.M.O. Reincke	770
88: Entrepreneurship in Engineering Programs: A Methodology for Systematic Literature Review by Saül Garcia Huertes and Ramon Bragós	780
89: Correlation Study Between the Performance in Different Engineering Courses and Project-Based Courses by Sandra Bermejo, Ramon Bragós, Francesc Rey, and Josep Pegueroles	793

118: Online and Blended Labs for Practical Mechanical Engineering by Christian Stöhr, Veronica Olesen, Shahram Sheikhi, Robert Langer, Vladimir Kuts, Margus Müür, Antti Nousiainen, Ari Putkonen, Sakari Koivunen, Yihua Zhang, Jens Kabo, Mikael Enelund, and Johan Malmqvist ...	805
122: Visualizing Extracurricular Student Teams Learning at Tu/e Innovation Space with CDIO Syllabus by Eugenio Bravo, Ana Valencia, Isabelle Reymen, and Jan van der Veen	820
123: Student-Centered Learning Activities for Key Sustainability Competencies in Online Courses with Many Students by Johan Berg Pettersen and Ulrika Lundqvist.....	831
139: Motivation for Continuous Software Engineering Expertise Development Through Lifelong Learning by Anne-Maarit Majanoja, Antti Hakkala, Seppo Virtanen, and Ville Leppänen	845
140: Hybrid Education – A Critical Review Into Challenges and Opportunities by Anders Adlemo, Amjad Z.K. Al-Musaed, Patrick Conway, Åsa Hansen, and Marisol Rico-Cortez.....	857
175: Engineering or Computer Science, What Is the Deal? by Ásrún Matthíasdóttir	866
177: Lessons Learned from Teaching and Tutoring – Design Thinking for Electrical Engineering Students by Kjell Are Refsvik, Ole Andreas Alsos, and Torstein Bolstad.....	879
180: Engineering Technology Students’ Self-Regulation: A Baseline by Shan Tuyaeerts, Tinne De Laet, Lynn Van den Broeck, and Greet Langie.....	891
181: Lifelong Learning As Explicit Part of Engineering Programmes: A Case Study by Rani Dujardin, Lynn Van den Broeck, Sofie Craps, and Greet Langie.....	902
182: Assessment and Feedback Across Various Outcomes in Project-Courses: A Department-Wide Study by Gabrielle Hansen and Guttorm Sindre	913
183: Engineering Students’ Self-Regulation Competencies – The Relationship Between Perceptions and Summative Scores by Van den Broeck Lynn, Dujardin Rani, and Tuyaeerts Shandris	923
192: Global Competence Needs: A Comparative Study of Stakeholders’ Perspectives on Engineering Education by Tanja Richter, Björn Kjellgren, Elisabet Arnó-Macià, and Karen Fleischhauer	931
209: Integrating Sustainable Development in a Computer Science Program: A Review by Marcia Muñoz, Claudia Martínez-Araneda, and Matilde Basso	941
212: Constructivist Principles As Used for Enhancing Active Learning – Case: Engineering Thermodynamics by Nader Ghareeb, Martin Jaeger, Perry R. Hessenauer, and Desmond Adair	951
213: Engaging Students Oriented Towards Usefulness in a Bildung-Oriented Engineering Education by Ronny Kjelsberg and Magnus Strøm Kahrs	966
216: The Effects of Learning Environments on Student Active Learning by Pasi Aalto, Ole Andreas Alsos, Dag Håkon Haneberg, Martin Steinert, Daniel Ege, and Ingrid Berg Sivertsen	975
